

LBUSD Secondary Math Pathways

Accelerated Pathways are for students who have shown mastery of the CA State Standards and have advanced mathematical maturity. Placement in the Accelerated Pathways is based on a comprehensive set of criteria. The Accelerated Pathways condense the mathematics standards into a shorter time frame (e.g., Math 6, 7, and 8 compacted into two years), while going deeper into the standards and providing a more rigorous learning environment. The Accelerated Pathways do not skip math courses or mathematics standards.
